

Pres. Trump, Secretary Chao, Sen. Thune, Leaders of the Trucking Industry

President Trump, Secretary Chao, Senator Thune, and Leaders in the Trucking Industry,

The tragic Tesla fatal crash on May 7, 2016, highlights a real and present highway danger -- cars sliding underneath large trucks when vehicles collide. No matter what caused the Tesla crash, the driver might have lived if the truck had had **side guards**.

U.S. & Canadian safety advocates are calling for an end to preventable truck underride tragedies. Hundreds of people die every year when pedestrians, cyclists, motorcyclists, and passenger vehicles go underneath trucks.

It can happen to anyone -- even if their car has a 5-Star Crash Rating. It can happen anywhere. It happened to AnnaLeah (17) & Mary Karth (13), when their car went under the rear of a semi-trailer on May 4, 2013, in Georgia. And it happened to Jessica Holman-Price (21) when she went under the side of a truck as a pedestrian on December 19, 2005, in Canada.

U.S. regulators have debated for decades about how to stop the tragedy of underride deaths -- including, **since 1969**, the possibility of requiring underride protection to be added to the **sides** of large trucks. But they have *not* done so, even though engineers have already found ways to solve this problem.

It's time for NHTSA to mandate side guards and for the trucking industry to start installing them.

Therefore, in light of the [tragic](#) and [unnecessary](#) countless [loss](#) of lives which [delays](#) in underride prevention have already cost, as well as the continued tragic and preventable loss of life sure to occur if decisive action is not taken now, the signers of this petition:

1. Call on President Trump to immediately sign a Vision Zero Executive Order to authorize Vision Zero rulemaking policies which will impact all DOT safety regulations and save more lives;

2. Call on DOT to act immediately and apply Vision Zero rulemaking principles by crafting a truck underride final rule -- with crash test-based performance standards rather than force-based design standards along with success at higher speeds -- to include rear (both centered and offset) and side guards for both Single Unit Trucks and trailers;

3. Call on Congress to support a comprehensive and effective truck underride standard; and

4. Call on leaders in the trucking industry to act immediately and support efforts to equip all trucks with effective underride protection.

We can do this. **Together**, we can save lives. Someone is counting on us. . .

Sincerely,

Jerry & Marianne Karth, along with all signers of this petition

19.	Tim Mock	Raleigh, NC	This is really common sense. Not only will this save lives, it will also likely improve fuel efficiency for the trucks.
20.	Kristin Gay	Elm City, NC	I personally know individuals who have lost their lives or the lives of loved ones due the lack of rear and side guards on tractor trailer trucks which is completely preventable if the trucking companies would take ownership of proper precautionary/ preventive measures to ensure they have equipped their drivers vehicles to be as safe as possible. If trucking companies would get on board with this program maybe insurance carriers would offer a rate reduction for the addition of these safety features. Tractor trailers are already a moving danger on the highways and roads due to their size, weight, blind spots, etc... any additional precautionary measure to help reduce the number injuries and fatalities caused by these machines is a MUST!
21.	Scott Linke	Willard, NC	My friends daughters were killed in a semi trailer crash
22.	Annette Reynolds	Rocky Mount, NC	This could happen to anyone. It could happen to your family members. It is important that the trucks on the highway are equipped with as many safety precautions as possible. The trucks are already dangerous enough, most feeling as if they own the road without care of other drivers on the road. They're only concern is getting to their destination as quickly as possible. Sadly, some without the concerns of others on the highway. This one protection could save lives, no matter what the cost. You cannot put a price on a life.

Tractor trailers are dangerous enough due to their size and weight. If you want people to stop buying gas guzzlers, put some effort into making the roads safe for smaller cars.
73.	Sara Rich	Quiman, GA	After watching the NBC Today Show and seeing that Europe has had side guards on their semi trucks since the late eighties, I am outraged the USA has not made them mandatory. 200 people die in undercarriage deaths each year. Let's stop this!

80.	Wendy Phelps	Philomath, OR	It is stupid that cash is the only reason that these guards are not in place. A few pennies in higher prices are worth a life. Congress shouldn't be able to be on a committee that determines safety or anything else if they get donations from related companies.

86.	Greg Showalter	Seattle, WA	Requiring side curtains will save lives and save fuel due to streamlining. The argument that it is not technically possible is a red herring serving the trucking industries self interest.

88.	Annette C	Eldridge, IA	
89.	Natasha Foster	Bothell, WA	
90.	Edward Murzyn	Fridley, MN	The fix is easy and the cost negligible in comparison to good tires and maintenance of braking systems. Side curtains can be placed in a way to decrease drag and subsequently increase fuel efficiency. The industry pushback and regulatory ambivalence is despicable. Europe is leaps and bounds ahead of us in roadway safety.
91.	Laurie Tumulty	New Castle, DE	Why wouldn't it be.
92.	Curtis Noel	Marquette, MI	We once had a couple of large trucks on the road. As a driver of that truck I would have gladly paid for the guards than risk the legal costs related to causing a death. It is good business sense and the insurance industry should be supporting this.

My sister miraculously survived an underside crash when big rig sped off an onramp and immediately drove across her path on the highway. Then the police said it was HER fault because truck drivers are very familiar with their routes and are well trained. She was driving the same route she drove every day for many many years. If rigs were required to have these side guards I believe many lives would be saved!

Marvin Johnson	Parker, CO	Having driven the interstate between Chicago and Detroit for many a year where truck traffic is very intense, it is frightening to be boxed in on all sides by tractor/trailer units and knowing you have NO CHANCE if the trailer swerves as little as six feet due to wind gusts, icy roads or driver error. I would look at the undercarriage of trailers and knowing "There but for the grace of God go I." I witnessed the horrific results of such an accident not far out from Detroit a decade ago and seeing first responders just <i>(continues on next page)</i>

The impact knocked me side ways and I was saved from being decapitated. I saw a news report on the Today Show about the side panels in Europe. There should be a law mandating that all trucks have to have them. Any future cases should give automatic penalties to the companies that do not have them!

Just putting side lighting/illumination on tractor/trailers has helped immensely. They are big heavy trucks and trailers.

4,753. Michelle Novak	Delevan, NY	<p>I'm one of the countless survivors who has lost a deeply loved one to an utterly preventable crash--preventable, that is, had the government not decided that rules, laws and regulations were a filthy commie concept, on their way to "the end of history," and teaming up with gigantic corporate interests to occupy the world, or just blow it up, to ensure there will never be an alternative to profits over humanity. There are ever so many more people inn this country sick to death of "rules and taxes are for little people." We're also sick of having risk, cost and consequences that belong to corporations, dumped onto millions and millions of people so that the ever-growing appetite for an ever-increasing revenue stream to the top. All that dumping comes in the form of something just like side under-ride guards. The industry has spent a lot of money to keep them away because they can use the money they dump into the laps of corporate occupiers of govt to gain many more favors than just this one. They get so much bang for their buck with all of you. And you do wonderful tricks for their treats: you've all ensured that side guards STILL aren't on trucks, and have left individual citizens to do the work of designing, prototyping, fabricating and testing them.</p> <p>People die when a segment of the population with very outsized influence in govt, and overwhelmingly devastating impacts on other human beings, get away with murder because they've either purchsed the govt, or simply become the govt.</p> <p>We're all aware that you're actively ungoverning our nation. We know the constant frustration of getting a back turned on us no matter what we're pleading for. You all have a classic CEO's approach to this: you're in charge, and everyone else can go to Hell.</p> <p>We're not done fighting. We're not giving up. And the safety community wil be everywhere the trucking and trucking industries are--to fight them--and you--every</p> <p><i>(continues on next page)</i></p>

4,753. Michelle Novak	Delevan, NY	<i>(continued from previous page)</i> step of the way. In memory of Chuck Novak, 22, and Teri Weaver, 23, killed by a sleeping truck driver doing 70 mph. Three other human beings were killed along with them. And 11 people were injured. That was back in 2010. Not bloody much has been accomplished to get the killing and maiming to stop. But an awful lot of orphans have been created since then. We want to see a complete change from you--dare I use the dirty word "radical?"

6,353. Karen Ashley Mathews	Greensboro, NC	Side impact guards added to trucks WILL SAVE MANY LIVES!!! This is very similar to the accident my husband, Robert, and I had in 1972 when we were on our way home from college for Spring Break. The difference is that when Robert swerved to try to miss the truck that pulled out in front of us, the left front and the driver's side of our car received the majority of the impact. That side of our car was partially under the flat bed truck before it was ejected during the collision. As a result, Robert and our friend who was sitting behind him died, while our five month old son and I survived. Please make your number one priority as a way of honoring those who have been lost and to save lives in the near and distant future.

8,311. Mary Wisner	Holland, MI	It is important because it will save lives. My family puts a lot of miles on the road and we want it to be safer for us as well as for others. I cannot imagine being a truck driver and having someone die while on my watch when it could have been prevented but isn't because WHY? You should do it because it is morally the right thing to do. You can because the technology is available.

Yes, that cost is passed on to those who use my services. The same needs to take place in the trucking industry. Over time, the cost to us all will far be exceeded by the benefit.

It is also salient that the trucking industry contributes millions to politicians so they can save money on truck modifications. I got a message to the industry: Stop paying off politicians and channel that money into safety rails. And to the politicians: Represent us the people, not the trucking industry. We are watching you.

Thank gosh my brakes worked really good cause if they didn't we would've been the next victims. But driving now these days it always haunts me the vision I had that day of my daughter & I being killed because of the stupidity of that 1 semi driver! This law needs to be passed & I stand strongly on this issue!

8,973.	Jack Mindy	Webster, NY	I am one of the lucky ones. In a Buffalo suburb, the semi in front of me rotated 90 degrees and was headed north on an east-west Interstate. I barely had time to think of my family, and Jayne Mansfield. Fortunately, I was able to aim my car at the "head end" of the rig. My Alfa Romeo and my seat belt protected me well while the rear end of the car (I was told later) left the ground on impact. Although it happened back in the late 1970s, I often recall that frightening moment when I pass a semi on a highway. I look under the side of the trailer and wonder why there are no side guards.

It is obvious to me that the trucking industry has bribed congressmen to avoid installing effective safety features, as has been the case many times before with vehicular safety features like seat belts, air bags, emission controls, etc. Industry will not comply voluntarily in matters affecting the general good or public safety & health--unregulated so-called free market capitalism is a failed system just like communism (but Marx was right about capitalism, sad to say). brucefaurot@gmail.com
