# Introduction

In the aftermath of losing our two youngest daughters, AnnaLeah (17) and Mary (13), due to a truck underride crash on May 4, 2013, we became aware of far too many facts about traffic fatalities.

Along the way, we discovered that a global movement is underway-called Vision Zero. This term was coined in Sweden and has as its basis a couple of “ethical rules” <sup>1</sup>:

- “Life and health can never be exchanged for other benefits within the society”
- “Whenever someone is killed or seriously injured, necessary steps must be taken to avoid a similar event”

Every life is worth saving; there is no person who will not be missed by someone: <sup>2</sup>

In an effort to do more than just put a bandaid on the problem, we launched a campaign to call for major change in how safety laws and regulations are determined. This book is a compilation of our request for a National Vision Zero Goal and for a Vision Zero rulemaking policy. It includes our petition letters to President Obama and DOT Secretary Foxx—along with the signatures and comments of thousands of people who signed the petitions and are speaking up with us to call for a move Towards Zero Crash Deaths & Serious Injuries.

---

<sup>1</sup><http://www.monash.edu/miri/research/reports/papers/visionzero>

<sup>2</sup><https://www.youtube.com/watch?v=bsyvrkEjoXI>

**Part I**

**Vision Zero**

## What is Vision Zero?

Vision Zero, in the simplest language, is the embracing of a vision or hope that we could work toward reducing crash deaths (and serious injuries) to zero. That no one would ever die in a traffic crash. It is, of course, understood that—life being what it is—we will never actually reach zero.

But Vision Zero insists that certainly such a goal is desirable and, in fact, so much so that everything humanly possible should be done to accomplish it. One life at a time. To do anything less would be unthinkable.

What would a Vision Zero philosophy/goal/policy mean to us as a country? Here is how Neil Arason, Canadian author of *No Accident*, views Vision Zero:

“I think people have different views about vision zero but here is mine. The airline industry does not apply cost benefit analysis to fixing aviation problems. They just fix problems and that is that. Using a cost benefit model is incompatible with vision zero because it applies trade-offs and vision zero does not entail that. Vision zero is about making the system a safe one and does not assign value to a human life because doing that, the thinking goes, is unethical.”<sup>1</sup>

This book is a compilation of our request for a **National Vision Zero Goal** and for a **Vision Zero rulemaking policy**. It includes our petition letters to President Obama and DOT Secretary Foxx—along with the signatures and comments of thousands of people who signed the petitions and are speaking up with us to call for a move Towards Zero Crash Deaths & Serious Injuries.

---

<sup>1</sup><http://annaleahmary.com/2015/12/starting-tzd-traffic-safety-conversation-who-should-pay-for-the-cost-of-saved-lives/>

The book also includes an appendix full of [annaleahmary.com](http://annaleahmary.com)<sup>2</sup> posts written on how and why Vision Zero should be applied. For example, one of the posts describes why we are pushing so hard to get people to sign a Vision Zero petition. What difference would it make anyway? The reason we are devoting our lives to pounding on this door and asking for change is that our daughters may have lost their lives due to the lack of a Vision Zero policy.

A decision which concluded that recommended changes would not be cost effective—in other words, that it would supposedly cost more to implement safety measures than the lives saved would be worth—may have led to lax underride guard standards. If the best possible protection had been pursued when the regulations were last updated (1996), the trucks on the road today (including the one on the road May 4, 2013) might be much safer to be driving around.

Mary and AnnaLeah might even still be around.

Furthermore, the issue of underride guards is just one among many problems which, if a National Vision Zero Goal were in place, could be addressed more compassionately—as if human lives were really more important to us than our pocketbook.

There is also a drafted **Vision Zero Executive Order** as a recommendation for outlining a means of implementing a National Vision Zero Goal and granting DOT the authority to adopt a Vision Zero rulemaking policy.

Finally, there is a draft for a **presidential memorandum mandating a task force** to address these issues in a collaborative effort at a national level in order to establish national traffic safety standards which should be adopted by all states.

---

<sup>2</sup><http://annaleahmary.com>

## Why Are We Advocating For Vision Zero?

32,675 people died in U.S. traffic crashes in 2013.<sup>1</sup> Two of those people were my daughters, AnnaLeah (17) and Mary (13). That number decreased to 32,675 deaths in 2014. Down by 44, but still far too many deaths in my book. In fact, early estimates show an increase in traffic fatalities in 2015.<sup>2</sup>

I survived a horrific truck crash in which our car was pushed by a truck into the rear of another truck. Backwards. My daughters in the back seat were not so fortunate; they went under the truck and the truck broke their innocent bodies.

Underride deaths are preventable and unnecessary and now is the time to take extreme action to reduce these deaths—no matter who caused the crash! Let's not wait for collision avoidance technology to kick in before kicking out preventable underride deaths!

The underride problem is just one example of the fixable problems we need to address. Michael Lemov has written an eye-opener, *Car Safety Wars: One Hundred Years of Technology, Politics, and Death*, in which he tells us that in the more than 110 years since the first traffic crash in 1898, more than 3.5 million Americans have been killed and more than 300,000,000 injured in motor vehicle crashes [p.9]. This, I learned, is 3x the number of Americans who have been killed and 200x the number wounded in all of the wars fought by our nation since the Revolution [p.10]. Imagine.

<sup>1</sup><http://www.nhtsa.gov/About+NHTSA/Press+Releases/2014/traffic-deaths-decline-in-2013>

<sup>2</sup><http://www.nhtsa.gov/About+NHTSA/Press+Releases/2015/2014-traffic-deaths-drop-but-2015-trending-higher>

Are you aware that **Death by Motor Vehicle** is one of the leading causes of deaths?

“Worldwide it was estimated that 1.2 million people were killed and 50 million more were injured in motor vehicle collisions in 2004.[2] Also in 2010 alone, around 1.23 million people were killed due to traffic collisions.[3] This makes motor vehicle collisions the leading cause of death among children 10–19 years of age (260,000 children die a year, 10 million are injured)[4] and the sixth leading preventable cause of death in the United States[5] (45,800 people died and 2.4 million were injured in 2005).[6] It is estimated that motor vehicle collisions caused the deaths of around 60 million people during the 20th century,[7] around the same as the number of World War II casualties.”<sup>3</sup>

Lemov’s book sheds light on many things including the fact that, although the blame was often put on the driver for crashes in the 20th century, in fact crashes and crash deaths are additionally caused by other factors including environmental and vehicle factors. He uses a term which I had never heard before—post-crash injury or “second collision.” He describes it this way:

“It is the collision of the occupants of a vehicle with its interior, or the road, after the initial impact of a car crash. Ultimately the creativity of a few scientists, doctors, and investigators. . . developed an understanding of what actually happens to a human body in a car crash. . . Researchers gradually developed ideas they hoped would prevent this second collision.” [p.16]

We can thank these researchers for paving the way for improved vehicle safety, including things like seat belts, air bags, and even car seats that lock in position. But, for far too long, it has been a major battle—as Lemov says, a car safety war—to bring about changes which will save lives.

Our own crash demonstrated the many factors which can contribute to the occurrence of crashes as well as to the deaths and horrific injuries which too often occur as a result. We learned the hard way that many of these are preventable and that *Our Crash Was Not An Accident*.

Following our truck crash, on May 4, 2013, we have learned more than we ever wanted to about traffic safety issues. We took the *AnnaLeah & Mary*

<sup>3</sup>[https://en.wikipedia.org/wiki/Epidemiology\\_of\\_motor\\_vehicle\\_collisions](https://en.wikipedia.org/wiki/Epidemiology_of_motor_vehicle_collisions)

Stand Up for Truck Safety—Save Lives and Prevent Injuries! Petition to DC on May 5, 2014 and helped to initiate an update in the underride protection for tractor-trailers.

Following that, we worked to promote underride research and have helped to organize an international Underride Roundtable on Thursday, May 5, 2016, when researchers, government officials, and industry leaders will gather to discuss truck underride crashes and how to reduce the risks for passenger vehicle occupants, bicyclists, and pedestrians. We will explore the scope of the problem and how regulation and voluntary action can help address it. There will also be a demonstration of underride guard performance in a crash test.

But, along the way, as I engaged in safety advocacy efforts—calling, emailing, and meeting with legislators—I quickly realized that all too-often it was 2 steps forward 3 steps backward. I began to ask, “Why is it so difficult to get anything done to save lives?” and “Why isn’t the best possible protection being adopted?”

I learned that one of the biggest obstacles was that public policy and more specifically DOT rulemaking is impacted by a requirement for cost/benefit analysis which tips the scale in the favor of industry lobby and the almighty dollar and makes a mockery out of the word safety. Human life becomes devalued in the process when a safety measure is rejected because it “may not have significant safety consequence.”<sup>4</sup>

This is illustrated in the history of Federal rulemaking on truck underride guards outlined by the Insurance Institute for Highway Safety, where it was indicated that in “1974: US Secretary of Transportation says deaths in cars that underride trucks would have to quadruple before underride protection would be considered cost beneficial.”<sup>5</sup>

I determined to battle such an inconceivable, incomprehensible, and unconscionable attitude and determined to find a better way to protect travelers on the road. After talking with numerous engineers who either were convinced that safer underride guards could be made or had already designed ones, I also discovered a global movement that calls for the reduction of crash deaths and serious injuries: Vision Zero—An ethical approach to safety and mobility.

After launching an online petition Save Lives Not Dollars: Urge DOT to Adopt a Vision Zero Policy on September 29, 2015, I discovered that an

<sup>4</sup>[http://www.regulations.gov/#!documentDetail;D=NHTSA\\_FRDOC\\_0001-1548](http://www.regulations.gov/#!documentDetail;D=NHTSA_FRDOC_0001-1548)

<sup>5</sup>[http://www.iihs.org/media/faa5dfa3-e46b-4f10-a542-228bb8844f17/-2034281871/Testimony/testimony\\_2009-05-18.pdf](http://www.iihs.org/media/faa5dfa3-e46b-4f10-a542-228bb8844f17/-2034281871/Testimony/testimony_2009-05-18.pdf)

Executive Order had been signed by President Clinton which had set in place the cost/benefit analysis rulemaking policy which all-too-often delays or blocks traffic safety regulations. I immediately set out to petition President Obama to set a National Vision Zero Goal with the establishment of a White House Task Force to Achieve a Vision Zero Goal of Crash Death Reduction. Furthermore, I believe that it is necessary to cancel out the negative impact of Executive Order 12866 in order to end this senseless war over safety. That is why I am asking President Obama to sign a new Vision Zero Executive Order.

Why are we devoting our lives to pushing for a DOT Vision Zero policy? Because I truly believe that it can have an impact not just on truck safety but on all issues related to highway and auto safety—including auto safety defects, driver training requirements, all kinds of impaired driving (including distracted driving, drunk driving, and driving while fatigued), and proven national traffic safety standards which should be adopted by all states.

We are taking these petitions (over 16,000 signatures to date) to Washington, DC, on March 4, where we will be meeting with DOT policy officials to discuss the need for this radical change in how our nation protects the travelers on our roads. Help us persuade President Obama to set a National Vision Zero Goal & to sign a Vision Zero Executive Order which will allow DOT to adopt a Vision Zero rulemaking policy.

It is time to stop acting like the value of a human life can be measured with and compared to corporate dollars. Every delay costs someone their life.

Let's get it right, America. Somebody's life depends on it. Lots of somebodies.

## About AnnaLeah and Mary Karth

*taken from the website set up in their memory: <http://annaleahmary.com/>*

On May 4, 2013, four members of the Karth family (a mother and the 3 youngest of her 9 children) drove from North Carolina to Texas to celebrate four family college graduations and the wedding of one of those siblings. While in Georgia, their car—in the right lane—was hit by a truck in the left lane that did not stop in time for slowed traffic and was charged with failure to maintain lane. The impact spun their car around and the truck hit their car a second time, forcing it backward and underneath a second truck's trailer. That truck then also ran into the side of the second truck.

All four of the people were trapped and needed to be extricated with the Jaws of Life. Marianne and her son were in the front seat and survived the impact with injuries. AnnaLeah and Mary were in the back seat, which went underneath the trailer, and died as a result of catastrophic injuries.

In the aftermath of the Karth family's devastating crash, the police have been unable to produce hours of service (HOS) logs for the truck driver. Given the truck driver's actions and the lack of skid marks or other evidence of evasive maneuvers, and the absence of HOS logs, the Karths believe that driving over HOS limits and the resultant fatigue could have played a large part in the crash that killed AnnaLeah and Mary and injured Marianne and her son.

Additionally, the trucking carrier only held one million dollars in insurance to cover all of the damages involved in the crash. These damages include the loss of two lives and three hospitalizations which included measures to save Mary's life before she passed away, and significant property damages. Two trucks were badly damaged and the Karth's car was

totaled. One million dollars is woefully inadequate to cover even the loss of one life let alone multiple losses, medical care costs, and damages.

Our website is dedicated to preventing more deaths from happening in truck-related crashes. Specifically, the Karth family is working to raise awareness about three issues related to truck safety: driver fatigue, minimum liability insurance levels, and underride guards. More information can be found on the pages specific to those issues.

This personal tragedy has informed our efforts in the aftermath of the crash to bring about a National Vision Zero Goal: moving our country closer to reducing crash deaths and serious injuries: Are you aware that Death by Motor Vehicle is one of the leading causes of death?

## Traffic Injuries & Fatalities Data

## Truck Underride: A Practical Application of a Vision Zero Goal

*An Essay by Marianne Karth*

It is a common business practice to develop a Vision Statement which exemplifies the goals of the organization and which will direct its decisions, practices, and activities.

Let me give an example of this. Our family helped to develop a Vision Statement for Family Promise of Midland, Texas: *End Homelessness, One Family at a Time*. Will there ever be zero homeless families? Probably not. But that vision is what we aimed for; it guided our steps.

What can a vision statement do? It can, “encourage strategic thinking and help organizations share concise information about their plans and progress toward impact.”<sup>1 2</sup>

Similarly, *Vision Zero: Reduce Crash Deaths & Serious Injuries* is a vision statement that serves to move us ever closer to ending preventable, senseless and tragic crash deaths & serious injuries—one life saved at a time. That vision guides our steps to discover and implement proven means to save lives—to make saving human life a priority over saving money.

Specifically, we have chosen to advocate for resolution of a problem which has too-long been ignored: truck underride crashes. It is well-known that the current underride guard standards are inadequate; they result in guards that are weak and ineffective and all-too often lead to tragic deaths and horrific injuries. The really bad thing about this is that many people have

---

<sup>1</sup><https://www.guidestar.org/report/chartingimpact/650820583/family-promise-midland-texas.pdf>

<sup>2</sup>[http://www.midlandvolunteerconnections.org/agency/detail/?agency\\_id=42248](http://www.midlandvolunteerconnections.org/agency/detail/?agency_id=42248)

already taken the time to prove that this situation is unnecessary and that better protection is possible.

Therefore this is what I am asking for as a Vision Zero strategic application:

We have spent a lot of time reflecting on the inadequacy of current rear-impact guards to prevent underride by passenger vehicles along with the concomitant difficulty of holding trailer manufacturers accountable for the horrific injuries and deaths which all-too-often occur as a result.

The current means of regulating the manufacture of underride guards requires the trailer manufacturer to design its underride guards to meet certain specifications. Once the manufacturer has met those requirements, then, currently, it cannot normally be held liable for any failure of the guard to withstand a crash—along with any resultant property damages, injuries, or death.

We would like to propose a change in the approach to regulating truck underride guards. We are requesting/recommending that the manufacturer be required to design and crash test a guard which would withstand a crash at any speed up to 50 mph and at any point along the back of the trailer.

Furthermore, we are requesting that, when a real-life underride crash does occur with one of their trucks, the manufacturer be held financially responsible for the cost of a thorough crash reconstruction, which would identify—at minimum—the speed which was traveled and whether the guard gave way with the impact of the crash.

With this new approach to regulating underride guards, the manufacturer would thereby be accountable for any failure of the guard to withstand a crash and thus be held responsible for ensuring a very important public outcome: prevention of horrific injuries and deaths due to underride crashes.

This is in sharp contrast to the current situation where no penalty is normally paid for a failed underride guard—except by the victims and their loved ones.

p.s. This link provides a perspective on prevention of crash fatalities as a public health outcome (although it does not mention truck safety issues in particular): World Health Organization: Road Traffic Injuries<sup>3</sup> and see, also: NHTSA: The Crash Outcome Data Evaluation System (CODES) And Applications to Improve Traffic Safety Decision-Making<sup>4</sup>

---

<sup>3</sup><http://www.who.int/mediacentre/factsheets/fs358/en/>

<sup>4</sup><http://www-nrd.nhtsa.dot.gov/Pubs/811181.pdf>

p.p.s. We do not pretend to be experts on details such as whether 50 mph is the most appropriate speed limit to require. We do know, however, that requiring manufacturers to prevent crashes only at lower speeds inevitably means that many lives will be unnecessarily lost—placing a low value on human life. Corporate gain over tragic, preventable, and irrevocable loss of life.

p.p.p.s. Additionally, we have been told that this level of protection is highly possible and we are taking steps to encourage further research on this in the near future.

p.p.p.p.s. Oh, and did I ask for a requirement to install not only rear underride guards but to likewise protect people from side and front underride collisions on all new trucks, as well as retrofitting existing trucks?

The stated mission of the National Highway Traffic Safety Administration (NHTSA) is “to save lives, prevent injuries, and reduce economic costs due to road traffic crashes, through education, research, safety standards, and enforcement activity.”<sup>5</sup> To be in accord with that mission, NHTSA should act now to make a comprehensive underride regulation in a timely and decisive manner. Why wait?

To not provide the best possible protection, and thereby sentence countless people to **Preventable Death by Motor Vehicle**, is ethically and morally unconscionable and unthinkable.

## Comments on the NPRM for Rear Underride Guards on Trailers by Jerry Karth

(February 14th, 2016)

I would like to respond to the underride guard rulemaking that is presently open for public comments. I would like to offer my opinion on this very important topic. I am by no means an engineer but will encourage those experts to respond to this rulemaking as well. I am, nonetheless, a victim of the past policies of the DOT and NHTSA to determine highway safety matters.

After having delivered over 11,000 signed petitions to the Department of Transportation (DOT) on May 5, 2014, we are encouraged to see some action on this issue take place. We are, however, very disappointed that the DOT is only proposing to adopt the present Canadian standard which went into effect on September 1, 2007. This is an 11 year-old regulation during the time of the swiftest change in automotive technology, including safety, in history. NHTSA's proposed rule would provide very little improvement over the present U.S. Federal standard and is, in fact, already being met by a majority of the trailer manufacturers.

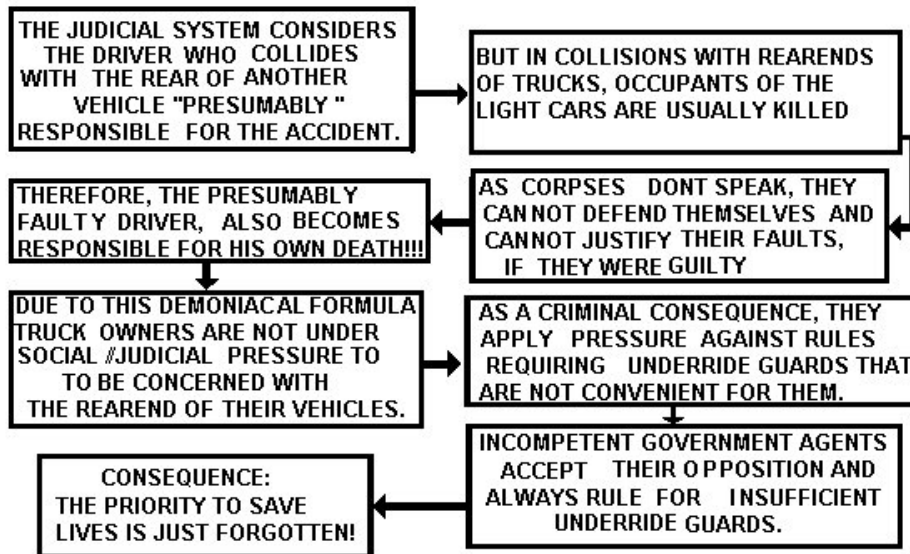

I can fully understand why the easiest path might have been taken in order to show some improvement. Yet such a course of action directly contradicts the promise made by Secretary Foxx when he met with my wife and other volunteers from the Truck Safety Coalition on September 12, 2013. Foxx stated that, "I promise that you will see tangible [i.e., substantial] progress" on truck safety issues in a short period of time. At that time, Marianne requested NHTSA to issue an improved underride guard rule be issued and to start the process of issuing a rule on side guards and front

override guards. That request was included in our May 5, 2014 petition as well.

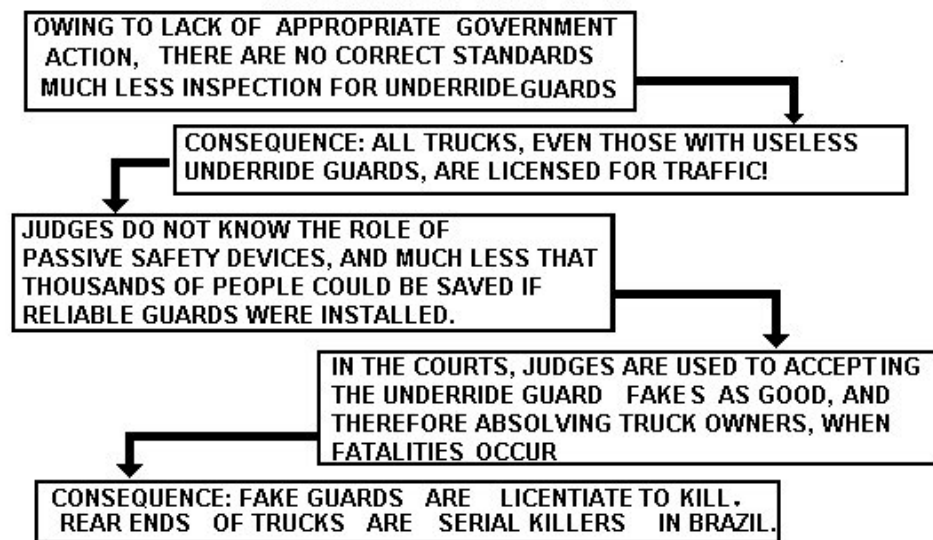

It has been almost twenty years since any improvements have been made on this safety standard and new regulations should be required reflecting advancements in technology. There are other countries worldwide that have developed stronger designs and standards and have participated in studies regarding safer practices, which should be reviewed and possibly adopted.

1. For example, the Insurance Institute for Highway Safety (IIHS) has shown that a Canadian trailer manufacturer, Manac, has developed a stronger underride guard design on trailers which they manufacture. <http://www.iihs.org/externaldata/srdata/docs/sr4907.pdf>
2. 1998 study, “Rear underride crashes kill thousands of people yearly worldwide. Underride guards did not follow the progress achieved by the automotive safety technology. Searching for solutions to this problem, two new guards have been designed and three crash tests carried out. A new articulated, an energy absorbing conceptual guard and a guard constructed according to the European (ECE-R58) regulation were tested. Both the new guards could avoid underride, <http://papers.sae.org/982755/>
3. The Intelliguard/Impact Project in Brazil tested energy-absorbing guards to 40 mph full and offset with computer models showing performance possible at 50 mph and more. Including a test with zero passenger compartment intrusion. <http://www.fem.unicamp.br/~impact/INTELLIGUARD.html> & <http://www.fem.unicamp.br/~impact/justice.htm> The Death Flow Chart from this website is copied and pasted below:

## DEATH FLOWCHART Nº 1

## THE DEATH FLOW CHART Nº 2

4. It is also known that the Monash University Accident Research Centre (MUARC) tested energy-absorbing guards to 75 km/h or 47 mph in the early 1990s. [http://www.monash.edu/\\_\\_data/assets/pdf\\_file/0006/216924/muarc026.pdf](http://www.monash.edu/__data/assets/pdf_file/0006/216924/muarc026.pdf) See an image below of a MUARC energy-absorbing underride guard.

Problems with underride guard protection have been known for years with little or no progress. In March 1977, the following testimony was provided to Congress:

Figure 6.1: MURAC energy-absorbing underride guard

The 25 year-old federal “rear end protection” standard for devices on the backs of tractor trailers and trucks is “a sham.”

The IIHS crash test program makes clear, Haddon told the subcommittee, that “there is absolutely no engineering justification for rear end truck and tractor trailer designs that permit impacting cars to underride, with resulting penetration of their passenger compartments and massive, sometimes fatal, injury to human contents.”

Haddon called it a “tragic puzzle” that both the problem of needless passenger compartment penetration in auto-truck rear underride crashes, and the availability of solutions to it, have been known for years both to industry and government—yet, neither has acted to apply the solutions.”

“Blood has been shed, heads literally have rolled and countless thousands of Americans been injured because those agencies did not act. Further inaction would be inexcusable,” Haddon warned. <http://www.iihs.org/externaldata/srdata/docs/sr1206.pdf>

If this proposed rule is the best that DOT and NHTSA can provide after twenty plus years, my blunt response, in the immortal words of General Norman Schwarzkopf, is “Bovine Scatology.”

In order to improve upon the proposed rule, in addition to reviewing past research efforts, I would encourage and request that the DOT and NHTSA review the work that is currently being done by a Senior Design Team of engineering students at Virginia Tech. Their underride design

will be presented at the May 5, 2016, Underride Roundtable at the IIHS Vehicle Research Center. Their design shows promise of greatly improving the current standard for a reasonable cost. Based upon their mid-year report, an estimated manufacturing cost of \$2,700 per trailer, when spread across a 15 year trailer life expectancy, would work out to be a daily cost of \$0.68. A small cost to save so many lives.

We have also worked with an accident reconstruction specialist, Aaron Kiefer, who has developed a design that will allow retrofitting an improved underride protection system to the current trailers on the highway. He believes that it will exceed the proposed standards, as well as the gas mileage requirements, and includes a side guard. The only thing lacking is testing of the design by the IIHS, for which we are attempting to raise money through our non-profit organization, AnnaLeah & Mary for Truck Safety. This should allow for immediate application of new safety standards for all trucks and trailers, including Single Unit Trucks, and not just the newly manufactured ones (two years out from release of a new rule).

We, also, received a research proposal from Dean Sicking (University of Alabama). He has indicated to us that he believes he can design an under-ride protection system which will prevent underride guard failures, and the injuries and deaths that occur as a result. Furthermore, he is confident that it can be done at much higher speeds than currently being proposed. He is the engineer that designed the soft wall technology for NASCAR—the SAFER Barrier—enabling race car drivers to walk away uninjured from crashes into the walls. Again, the only thing lacking is funding for his research.

Let's not make the mistake of ignoring and squashing innovative research which could take us above and beyond what has been previously been required or even thought possible. We made that mistake for too many years when the use of seat belts were rejected. <<http://www.secondchancegarage.com/public/seat-belt-history.cfm> & <http://www.amazon.com/CarSafety-Wars-Technology-Politics/dp/161147745X>>

When we visited the Research & Design Center of Great Dane, a trailer manufacturer, in June 2014, the CEO, Dean Engelage, made the following comments so us, “Cost is not a factor,” and, “Safety is important to us,” and, “We are not competitive about safety.” In addition, other trailer manufacturers have indicated to the IIHS that they are working on improved designs. Thus it appears that at least some trailer manufacturers are willing to improve their designs and save lives. I have contacted each major trailer manufacturer and requested that they voluntarily increase their design to meet the Manac standard. Yet they have either not replied or let us know

that they were waiting for the new regulations before proceeding.

Additionally, I would like to respond to the utilitarian logic approach that NHTSA has appeared to have applied to this issue. Their utilization of a cost/benefit analysis (called for by Executive Order 12866) is sadly lacking moral and ethical depth on the benefits side.

This type of logic was applied in 2000 by the Philip Morris Company in the Czech Republic when they funded a research study on the costs/benefits of smoking in the Czech Republic. <http://www.mindfully.org/Industry/Philip-Morris-Czech-Study.htm> The study concluded that it would be more beneficial for the people of the Czech Republic to smoke than not. What was this startling conclusion based on? A cost/benefit analysis. The results are summarized below:

Table 6.1: The public finance balance of smoking in the Czech Republic in 1999 is estimated at +5,815 mil. CZK

Effect	Amount
<b>Income and positive external effects</b>	<b>21,463 mil CZK</b>
Savings on housing for elderly	28,mil CZK
Pension & soc. expenses savings due to early mortality	196 mil CZK
Health care costs savings due to early mortality	968 mil CZK
Customs duty	354 mil CZK
Corporate income tax	747 mil CZK
VAT	3,521 mil CZK
Excise tax	15,648 mil CZK
—	—
<b>Smoking related public finance costs</b>	<b>15,647 mil CZK</b>
Fire induced costs	49 mil CZK
Lost income tax due to higher mortality	1,367 mil CZK
Days out of work related public finance costs	1,667 mil CZK
ETS related health care costs	1,142 mil CZK
Smoking (first hand) related health care costs	11,422 mil CZK
—	—
<b>NET BALANCE</b>	<b>+5,815 mil. CZK</b>

The study concluded that \$1,227 was saved in pensions, health care, and housing every time a smoker dies. (Table from <http://www.mindfully.org/Industry/Philip-Morris-Czech-Study.htm>)

In comparison, let's look at how this approach could be applied to the underride issue. This type of cost/benefit analysis could lead us to conclude

that it is not beneficial to require stronger underride guards because the benefits of keeping weak and ineffective standards for underride guards are greater than the cost of upgrading them to the best possible protection. What might those benefits be?

1. Save the trucking industry money by holding down manufacturing and installation costs.
2. Save the consumer money by holding down shipping costs.
3. Reduce medical costs by killing people at a younger age (and avoiding costly medical costs of the elderly population).
4. Preserve the Social Security fund by decreasing the number of people who draw from their account due to early Death by Motor Vehicle.
5. Improve the job market due to the decrease in the workforce from the elimination of workers through Death by Motor Vehicle.

In both cases, the conclusions lack common sense. I hope that we can agree upon that.

In other words, this kind of analysis could potentially require that we decide whether we are willing to fork over money to protect people from Death by Motor Vehicle. It forces us to choose between saving a life or saving costs. When that life is one of your loved ones, what would you choose? In contrast, a cost-effectiveness approach may be a better solution because it compares the relative costs and outcomes (effects) of two or more courses of action. “Cost-effectiveness analysis is distinct from cost-benefit analysis, which assigns a monetary value to the measure of effect.” [https://en.wikipedia.org/wiki/Cost-effectiveness\\_analysis](https://en.wikipedia.org/wiki/Cost-effectiveness_analysis) In this situation, the desired outcome of both courses of action would be an underride guard which did not fail upon collision with a vehicle. The two solutions could be compared based upon cost, but a performance standard of a successful crash test would guarantee that lives would be saved.

In conclusion, I would encourage the DOT and NHTSA to attend the Underride Roundtable on May 5, 2016, before issuing a final rule for the standards for underride guards. I would also like to propose that the Department of Transportation and NHTSA adopt a Vision Zero Policy for all traffic safety rulemaking and enforcement, including underride guards:

Vision Zero is a multi-national road traffic safety project that aims to achieve a highway system with no fatalities or serious injuries in road traffic. It started in Sweden and was approved

by their parliament in October 1997.<sup>(1)</sup> A core principle of the vision is that ‘Life and health can never be exchanged for other benefits within the society’ rather than the more conventional comparison between costs and benefits, where a monetary value is placed on life and health, and then that value is used to decide how much money to spend on a road network towards the benefit of decreasing how much risk. [https://en.wikipedia.org/wiki/Vision\\_Zero](https://en.wikipedia.org/wiki/Vision_Zero)  
<http://www.monash.edu/muarc/research/reports/papers/visionzero>

Jerry Karth, February 14, 2016

[Note to FMCSA: If \$9.4 million is going to be used as the figure for the Value of a Statistical Life (VSL), then I would ask again that they immediately increase the motor carrier limited liability insurance to this level. And, because we have been told that Secretary Foxx has the authority and power to perform this administrative action, then it should be resolved quickly.]

## Cost Effectiveness Analysis in OMB A-4

We believe that using a Cost Effectiveness Analysis in the rulemaking process for traffic safety issues will result in a better understanding of the true costs and benefits to the American people. Highway safety issues should be treated as matters of public health and safety.

The following quotes are extracted from documents created by the Office of Management and Budget (OMB) for guidance to Federal agencies on the development of regulatory analysis.

### 7.1 OMB Circular A-4

[https://www.whitehouse.gov/omb/circulars\\_a004\\_a-4/](https://www.whitehouse.gov/omb/circulars_a004_a-4/)

#### D. Analytical Approaches

“Both benefit-cost analysis (BCA) and cost-effectiveness analysis (CEA) provide a systematic framework for identifying and evaluating the likely outcomes of alternative regulatory choices. A major rulemaking should be supported by both types of analysis wherever possible. Specifically, you should prepare a CEA for all major rulemakings for which the primary benefits are improved public health and safety to the extent that a valid effectiveness measure can be developed to represent expected health and safety outcomes. You should also perform a BCA for major health and safety rulemakings to the extent that valid monetary values can be assigned to the primary expected health and safety outcomes.”

## **Cost-Effectiveness Analysis**

“Cost-effectiveness analysis can provide a rigorous way to identify options that achieve the most effective use of the resources available without requiring monetization of all of relevant benefits or costs. Generally, cost-effectiveness analysis is designed to compare a set of regulatory actions with the same primary outcome (e.g., an increase in the acres of wetlands protected) or multiple outcomes that can be integrated into a single numerical index (e.g., units of health improvement).”

## **The Effectiveness Metric for Public Health and Safety Rulemakings**

“When CEA is applied to public health and safety rulemakings, one or more measures of effectiveness must be selected that permits comparison of regulatory alternatives. Agencies currently use a variety of effectiveness measures.”

“OMB does not require agencies to use any specific measure of effectiveness. In fact, OMB encourages agencies to report results with multiple measures of effectiveness that offer different insights and perspectives. The regulatory analysis should explain which measures were selected and why, and how they were implemented.”

## **Monetizing Health and Safety Benefits and Costs**

“We expect you to provide a benefit-cost analysis of major health and safety rulemakings in addition to a CEA. The BCA provides additional insight because (a) it provides some indication of what the public is willing to pay for improvements in health and safety and (b) it offers additional information on preferences for health using a different research design than is used in CEA. Since the health-preference methods used to support CEA and BCA have some different strengths and drawbacks, it is important that you provide decision makers with both perspectives. In monetizing health benefits, a WTP measure is the conceptually appropriate measure as compared to other alternatives (e.g., cost of illness or lifetime earnings), in part because it attempts to capture pain and suffering and other quality-of-life effects. Using the WTP measure for health and safety allows you to directly compare your results to the other benefits and costs in your analysis, which will typically be based on WTP.”

## Children

“There are a few studies that examine parental willingness to pay to invest in health and safety for their children. Some of these studies suggest that parents may value children’s health more strongly than their own health. Although this parental perspective is a promising research strategy, it may need to be expanded to include a societal interest in child health and safety.”

“Where the primary objective of a rule is to reduce the risk of injury, disease or mortality among children, you should conduct a cost-effectiveness analysis of the rule. You may also develop a benefit-cost analysis to the extent that valid monetary values can be assigned to the primary expected health outcomes. For rules where health gains are expected among both children and adults and you decide to perform a benefit-cost analysis, the monetary values for children should be at least as large as the values for adults (for the same probabilities and outcomes) unless there is specific and compelling evidence to suggest otherwise.”

## Impacts on Children

“Under Executive Order 13045, ‘Protection of Children from Environmental Health Risks and Safety Risks,’ each agency must, with respect to its rules, ‘to the extent permitted by law and appropriate, and consistent with the agency’s mission,’ ‘address disproportionate risks to children that result from environmental health risks or safety risks.’ For any substantive rulemaking action that ‘is likely to result in’ an economically significant rule that concerns ‘an environmental health risk or safety risk that an agency has reason to believe may disproportionately affect children,’ the agency must provide OMB/OIRA ‘an evaluation of the environmental health or safety effects of the planned regulation on children,’ as well as ‘an explanation of why the planned regulation is preferable to other potentially and reasonably feasible alternatives considered by the agency.’”

**Part II**  
**Petition**

## Petition Letter to Secretary Foxx

{#petref}

Dear Secretary Foxx:

After losing two daughters, AnnaLeah (17) and Mary (13), in a truck underride crash on May 4, 2013, the Karth family took over 11,000 envelopes with signed petitions from the *AnnaLeah & Mary Stand Up For Truck Safety* Care2 Petition to Washington, DC, one year later on May 5, 2014. At that time, they met with administrators from FMCSA and NHTSA and discussed, at length, their concerns about truck safety issues.

Since that time, they have set up a non-profit, **AnnaLeah & Mary for Truck Safety**, to promote highway safety research and federal regulations to protect motorists, pedestrians, & cyclists. And, in fact, there has been some progress with the upcoming implementation of Electronic Logging Devices and the initiation of rulemaking steps related to underride guards and minimum liability insurance for truck companies.

However, we are concerned that these safety measures, as well as others, are being unnecessarily delayed and/or weakened. As you know, the Department of Transportation makes highway safety rules based upon how much safety measures will cost. We are hoping to change that and promote a **Vision Zero** safety strategy model with goals of Zero Deaths, Zero Injuries, Zero Fear of Traffic.

One of the biggest challenges to making change is the cost/benefit analysis. On the one side there are lives to be saved and on the other side there are companies working to make money. The trick is to try and meet everyone's needs. The solution has to be effective in saving lives while still being affordable for companies so that they can make the changes necessary without a lot of struggle.

The problem comes in when human life and health get the short end of the stick. The result is that many safety measures are blocked because they would cost more to implement than the “worth” of the “small” number of human lives which would be saved. That’s just not right.

**Therefore we are asking you to:**

- 
1. Change DOT rulemaking policy to move away from a cost/benefit model and adopt a more humanistic, rational Vision Zero safety strategy model.
  2. Apply Vision Zero principles by requiring crash-test-based performance standards for truck underride guards rather than force-based design standards along with success at higher speeds—to include rear (both centered and offset) and side guards for both Single Unit Trucks and trailers.
  3. Apply Vision Zero principles by requiring NHTSA to initiate rule-making to require forward collision avoidance and mitigation braking (F-CAM) systems on all new large trucks and buses with a gross vehicle weight rating of 10,000 lbs. or more.

On average, 33,000 people die each year in crashes on our roads. Our families cannot continue to sustain this unacceptably high number of losses and injuries. We urge you to take immediate action so that more lives will not be lost and to assure us that safety is your number one priority.

Sincerely,

(Complete listing of signatures starts on page 75)

## Selected Comments by Signers of the Vision Zero Petition

These are just some of the comments about the petition left by the people who signed it.

Please adopt stronger safety rules so that more lives can be saved. My sisters AnnaLeah and Mary Lydia are gone forever due to a truck collision, and no other family should have to go through this. Save lives.

—Rebekah Karth Chojnacki, Arlington, Texas

---

There shouldn't be a cost benefit analysis for lives...

—Katy Hartigan, Grayslake, Illinois

---

Secretary Foxx, it is avoidable and inexcusable that about 40,000 Americans die in vehicular crashes every year. Stop the cost/benefit analysis bean counting.

The lives of Americans are at stake.

—Lana Briscoe, Northport, New York

---

Three years ago, I was sitting in my apartment, working on my class projects, when I got a phone call that turned my world upside down. My family's car had been hit by a truck, and I was the first person that the hospital was able to reach. There was a lot of confusion; no one knew where my two sisters who had been in the back seat of the car had been taken. I had a pair of dice in my pocket that day, the same pair of dice that I had when my father called me later that evening with the news that my sister had died in the crash.

Humans are bad at estimating probabilities. A one-in-a-million chance sounds rare, but that's close to the odds the NWS reports for being struck by lightning, and 330 Americans are injured that way every year. It's rare, but it happens. In probability theory, it's called the law of large numbers. If you roll the dice often enough, or for enough people, the dice are going to come up as ones at a predictable, measurable rate.

The IIHS reported that in 2013, there were 10.3 deaths from motor vehicle crashes per 100,000 people. That's about one-in-ten-thousand, way more likely than one-in-a-million. And, unlike other leading causes of death, this is an entirely human-created problem, one that didn't exist two hundred years ago.

Automotive safety has been improving over time. But it is still one of the leading causes of death in America. Curing cancer, one of the other leading causes, is expensive and difficult, requiring research just to figure out if it is even possible. In contrast, for motor vehicle deaths there are many cases where we already know simple ways to reduce motor vehicle fatalities, such as effective underride guards, and we have promising research for even more. We shouldn't settle for one-in-ten thousand, or even one-in-a-hundred-thousand. We should strive to be better than that. Human lives shouldn't be a nickel and dime proposition.

Even low chances of death are still too high. I shouldn't have to roll the dice every time I need to leave my house. I shouldn't have to wonder, every time my family is out on the road, if today is going to be the day that they roll the wrong number again.

—Isaac Karth, Rocky Mount, North Carolina

---

Our families' lives are worth more than the cost in dollars.

—Donna Profeta, Ballston Lake, New York

---

The bottom line should NEVER outweigh the cost of a human life. The status quo needs to be changed before anyone else suffers such a tragedy as the Karths.

—Brie Handgraaf, Rocky Mount, North Carolina

---

I work in the accident reconstruction industry and see countless underride accidents each year, many ending in serious injury or death. The severity of injury in these types of crashes could be significantly reduced with the simple implementation of additional bracing on the trailers that travel our roadways.

—Ryan McMahan, Holly Springs, North Carolina

---

Seriously? Putting profit before human life is short term thinking and, by the way, immoral.

—David M. Dunn, LANSING, Michigan

---

Please prevent another family from losing a loved one and going through this heartbreak.

—LELA Lesson, Cortaro, Arizona

We should be living in a country of HUMAN VALUES,  
NOT DOLLAR VALUES

—Dianne Sullivan, Modesto, California

---

The Traffic Safety Coalition is proud to support the call for  
a Vision Zero safety model working towards zero deaths and  
zero grave injuries on our nation's roads.

—Michelle Dutton, Chicago, Illinois

---

We lost our daughter in a red light running crash on 1/26/02.  
A red light camera might have stopped the man who killed  
her. Our State has now virtually outlawed the use of red light  
cameras. Where is the cost/benefit in that???

—Suzann Oberhauser, Somerset, Ohio

---

Vision Zero has worked to reduce deaths in NYC, as well as in  
many countries in Europe. It's time for the US to take traffic  
safety seriously and prevent more deaths on our roads.

—Emily Stein, Medford, Massachusetts

---

Please support this lifesaving Policy! We are losing precious  
lives daily around our country. Best practices and safety de-  
vices alike must be utilized. #Safetysaveslives

—The National Coalition For Safer Roads, Bradenton,  
Florida

---

Protect the Nations highways for everyone. We have waited  
long enough. This insanity must stop. Families are dying.

—Joan Moore, san francisco, California

**Part III**

**Executive Order**

## Why do we need a Vision Zero Executive Order?

Vision Zero, in the simplest language, is the embracing of a vision or hope that we could work toward reducing crash deaths (and serious injuries) to zero. That no one would ever die in a traffic crash. It is, of course, understood that—life being what it is—we will never actually reach zero.

But Vision Zero insists that certainly such a goal is desirable and, in fact, so much so that everything humanly possible should be done to accomplish it. One life at a time. To do anything less would be unthinkable.

And yet, that is exactly what we find ourselves doing—too often making decisions based on other priorities. Somehow we are unable to justify spending time or resources to make it a tangible priority to do something about crash deaths—especially because we might even think that they are inevitable. And that's another thing about Vision Zero; it understands that many, if not most, crash deaths are in fact preventable and, oh, so unnecessarily tragic.

What does this look like in real life? It is beyond the scope of this book to describe the multitude of traffic issues which could and should be addressed, but let me just point out one: truck underride guards. Despite knowledge about the horrific deaths and injuries which take place when a car rides under a truck and the research which has shown how weak the current underride guards are and what could be done to strengthen them, there continues to be too little done to correct this situation.

The result is that year after year countless more people needlessly die because the underride problem did not get adequately fixed. When it could have.

To illustrate this, let me share part of the public comment made by the husband of a woman who died in an underride crash twenty years ago. He was commenting on the recent rulemaking for the upgrade of rear impact protection on trailers,

As Luis Otto from Brazil used to say, you can change. You do not have to be “Mad Gods with power over life and death”, you do not have to champion laws that kill! We know from a recent study that the previous underride guard law from 1996 which also legalized guards already on the road saved none or few lives! This law broke the heart and spirit of victims and safety activists and your recent actions will do no less. I work in honor of my late wife Tamara Mills Hadley as most victims labor in honor of their lost loved ones. We also work to save those we have not met, those waiting to meet their fate in the future. That boy or girl a couple of years from now that will die or be maimed or become an orphan if we fail! They are waiting, what will be my fate!

We as spouses, or parents, or grandparents worry everyday about our families safety on American roads. Roads and cars are safer but those increasing numbers of big trucks can still kill you in an instant. You will probably survive crashing into a telephone pole at mid range speeds but a stopped or slow moving truck, not so much! We worry! This sickness called ‘cost benefit analysis’ you and corporations worship so much can never value our hearts, it is a validation of our worst fears. You are in the process of giving away a windfall for the car and trailer manufacturers, no improvement or cost for the next twenty years, but you are smashing the hopes and wishes of so many. Tears will be shed! We demand Vision Zero, we do not have time for anything less anymore. Our hearts have ached for too long. —Steve Hadley<sup>1</sup>

What he expresses is the shared frustration of those who work diligently to face one unnecessary hurdle after another in the attempt to make the roads safer. And then, when they come to the end of the race, find that they have lost and that the race was hopeless to begin with because their opponent was impossible to beat. With an unfair advantage.

---

<sup>1</sup><http://www.regulations.gov/#!documentDetail;D=NHTSA-2015-0118-0004>

Only it is not a mere matter of a lost contest but an apparently hopeless quest to save other lives. Read that: to save someone from a sentence of Death by Motor Vehicle. When it could have been preventable.

And why is that opponent so impossible to beat? Because the plumbline used to measure whether a safety standard or regulation is affordable is the cost/benefit analysis delineated in Executive Order 12866<sup>2</sup>, which requires that a dollar value be attached to the benefit of a human life. And if the costs calculated are higher than the benefit, then that human life is not considered worthy of saving. The rule is thus rejected (or compromised) because it does not provide “significant safety consequence.”<sup>3</sup>

The Office of Information and Regulatory Affairs (OIRA) as an agency of the Office of Management and Budget has been given the responsibility to oversee this cost/benefit analysis and to make decisions accordingly about what safety standards are issued.<sup>4</sup>

OIRA, not the agency, makes the final determination of which rules are considered to be significant. For all significant rulemakings, the agencies must provide OIRA with the text of regulation, a statement of need, and “an assessment of costs and benefits of the regulatory action.”<sup>5</sup>

Economically significant regulations must meet additional analytical requirements: Anticipated benefits and costs must be quantified to the extent possible; Agencies must provide cost-benefit analysis of reasonable alternatives and “an explanation of why the planned regulatory action is preferable to the identified potential alternatives.”<sup>6</sup>

It is this process that we would like to see addressed by a Vision Zero Executive Order that would revise the rulemaking process to provide for the timely issuance and implementation of reasonable and appropriate safety measures which are proven to save lives. The opposite is to reject such measures because they would cost “too much” per life saved. Whose life are we planning on giving up?

We are not asking to throw out all research and analysis. After I discussed this concern with another safety advocate, he suggested the alternative ap-

<sup>2</sup><http://www.foreffectivegov.org/node/224>

<sup>3</sup>[http://www.regulations.gov/#!documentDetail;D=NHTSA\\_FRDOC\\_0001-1548](http://www.regulations.gov/#!documentDetail;D=NHTSA_FRDOC_0001-1548)

<sup>4</sup><https://www.whitehouse.gov/omb/oira/about>

<sup>5</sup><http://www.foreffectivegov.org/node/224>

<sup>6</sup><http://www.foreffectivegov.org/node/224>

proach of cost-effectiveness analysis vs cost/benefit analysis. I have taken a quick look at a description of it online and will be thinking about it further. This is a brief description of such an approach:

“Cost-effectiveness analysis (CEA) is a form of economic analysis that compares the relative costs and outcomes (effects) of two or more courses of action. Cost-effectiveness analysis is distinct from cost-benefit analysis, which assigns a monetary value to the measure of effect.”<sup>7</sup>

My question is, “Would such an approach lead to a reduction in crash deaths & serious injuries?” In other words, would it further the goal of Vision Zero? Towards Zero.

A cost effectiveness model is used by the Center for Disease Control, as described here:

Cost-effectiveness analysis (CEA) is a type of economic analysis where both the cost and the outcome (impact, result, effect, benefit, health gain...) of an intervention are evaluated and then expressed in the form of a cost-effectiveness ratio. The numerator of the cost-effectiveness (CE) ratio represents the cost of the intervention associated with one unit of “outcome”. The denominator is the unit of outcome. It can be expressed using many types of measures including: years of life gained, quality-adjusted life years gained (QALYs), new diagnoses, infections averted, and deaths averted. CEA is usually conducted on interventions that are known to be effective.

The CE ratio is a fraction used to compare the relative costs and outcomes of two or more interventions. In Example 1, the outcome measure chosen is “new HIV diagnoses” and the CE ratio of the programs evaluated is expressed in terms of “cost per new HIV diagnosis”. The CE ratio of Program A is \$41,667 per new HIV diagnosis. This ratio does not reveal the cost of implementing the program nor the number of new HIV diagnoses detected by the program. However, when comparing the CE ratio of Program A to that of Program B, we can say that Program B is more cost-effective than Program A when CE is measured in terms of “cost per new HIV diagnosis.”<sup>8</sup>

---

<sup>7</sup>[https://en.wikipedia.org/wiki/Cost-effectiveness\\_analysis](https://en.wikipedia.org/wiki/Cost-effectiveness_analysis)

<sup>8</sup><http://www.cdc.gov/hiv/prevention/ongoing/costeffectiveness/>

If one were to apply cost effectiveness analysis to override guards, a comparison would be made between alternative means of obtaining the desired outcome—prevention of override. The most cost effective means, i.e, the one able to prevent the most override deaths, would be selected. The performance standard would be an override guard that did what it was supposed to—save a life. That is what the regulation would require.

If we do not pursue this course of action, then who is ethically responsible for all of the deaths which will occur as a result?

## What is Needed to Bring About a National Vision Zero Goal?

*A proposal by Marianne Karth*

As we have indicated, our experience with a truck crash and its aftermath has enlightened us as to the state of the nation regarding traffic safety. It is our conviction that in order to bring the senseless and preventable highway carnage to an end in a timely fashion, the following actions are needed:

1. Set a National Vision Zero Goal.
2. Establish a White House Vision Zero Task Force to Achieve Significant Crash Death Reduction.
3. Sign a Vision Zero Executive Order to Authorize Vision Zero Rule-making Policies.

We have prepared a draft of each of the above in order to clarify what we are petitioning the President/United States to do in this regard.

**12.1 Action One: Set a National Vision Zero Goal**

Develop and formally adopt a Vision Statement such as the following:

“Move Towards Zero Crash Deaths & Serious Injuries—Choosing to Save Lives Not Dollars”

## 12.2 Action Two: Establish a White House Vision Zero Task Force To Achieve Significant Crash Death Reduction

Memorandum for the Heads of Executive Departments and Agencies:

SUBJECT: Establishing a White House Task Force to Achieve the Vision Zero Goal of Crash Death Reduction

On average, 40,000 people die each year in crashes on our roads. According to Advocates for Highway & Auto Safety, 362,532 Americans are “missing” i.e., lost their lives due to vehicle violence over the last 10 years. Using NHTSA figures of estimated injuries, nearly 1.5 million additional people suffered serious injuries during that time. Using DOT values of \$9 million in comprehensive costs per fatality, these losses would be valued by DOT to be about \$3 trillion.

Our families cannot continue to sustain this unacceptably high number of losses and injuries. Therefore, I am directing the Office of the Vice President to lead an inter-agency effort to address traffic safety issues, including coordinating Federal enforcement efforts by executive departments and agencies (agencies) and helping institutions meet their obligations under Federal law. To these ends, it is hereby ordered as follows:

Section 1. Establishment of the White House Task Force to Protect Travelers From Traffic Crashes.

There is established a White House Task Force to Protect Travelers From Traffic Crashes. The Task Force shall be chaired by a designee of the Office of the Vice President.

- (a) Membership of the Task Force. In addition to the Chair, the Task Force shall consist of the following members:
- (b) the Attorney General;
- (ii) the Secretary of Transportation;
- (iii) the Secretary of Health and Human Services;
- (iv) the Secretary of Education;
- (v) the Secretary of Labor;
- (vi) the Secretary of Commerce;
- (vii) the Director of the Office of Science and Technology Policy;
- (viii) the Director of the Domestic Policy Council;
- (ix) the Cabinet Secretary; and

- (x) the heads of agencies or offices as the Chair may designate.
- (b) A member of the Task Force may designate, to perform the Task Force functions of the member, senior officials who are part of the member's agency or office, and who are full-time officers or employees of the Federal Government.
- (c) The Chair will also establish an Ad-Hoc Committee to advise this Task Force, and appoint to the Committee at least 12 individuals with expertise in areas related to traffic safety, including—but not limited to—driver training, truck driver training, driver fatigue, traffic safety engineering, state and local traffic law enforcement, crash reconstruction, the automotive industry, the trucking industry, injury prevention, truck drivers, and safety advocacy. At least one member will be someone who has been directly affected by a traffic fatality.

#### Section 2. Mission and Function of the Task Force.

- (a) The Task Force shall work with agencies to develop a coordinated Federal response to traffic safety issues. The functions of the Task Force are advisory only and shall include making recommendations to meet the following objectives:
  - (b) providing all stakeholders with evidence-based best and promising practices for preventing and responding to traffic crashes;
  - (ii) building on the Federal Government's existing regulations and enforcement efforts to ensure that institutions comply fully with their legal and ethical obligations to prevent and respond to traffic crashes;
  - (iii) increasing the transparency of the Federal Government's enforcement activities concerning traffic safety issues;
  - (iv) broadening the public's awareness of traffic safety issues and, in particular, driver fatigue as it affects all drivers; and
  - (v) facilitating coordination among agencies engaged in addressing traffic safety issues and those charged with helping bring institutions into compliance with the law.
- (b) In accordance with applicable law and in addition to regular meetings, the Task Force shall consult with external stakeholders, including the Governors Highway Safety Association, MADD, other safety groups, ATA, TTMA, paramedics, coroners, ER professionals, law enforcement agencies, DMVs, DAs, American Association

for Justice, research and crash test organizations, educational organizations, truck drivers, and others as deemed wise and appropriate.

- (c) Because traffic crashes affect all ages, the Task Force shall evaluate how its educational proposals and recommendations may apply to, and may be implemented by, schools, school districts, and other elementary and secondary educational entities receiving Federal financial assistance.

### Section 3. Action Plan.

- (a) Within 90 days of the date of this memorandum, the Task Force shall develop and submit proposals and recommendations to the President for a National Vision Zero Goal. This will include specific strategies for moving toward the reduction of crash deaths and serious injuries. It will also outline specific strategies for establishing national traffic safety standards which are proven to reduce crash deaths and which could then be adopted, as is, by every state. These strategies will ensure that the following will occur:
  - (b) address the problem of traffic safety in a coordinated manner, including the following concerns: road design and conditions; all kinds of enforcement issues to be pro-active in preventing crashes; handling of traffic safety when crashes occur; driver fatigue—acknowledging the scope, extent, and gravity of Driving While Fatigued (DWF) as a reckless behavior both for truck drivers and drivers of light vehicles, and adjusting the legal system to reflect this reality; all kinds of distracted and impaired driving; automotive safety defect issues and their resolution as a high priority issue in a timely manner; and other problems as deemed appropriate, including the need for manufacturers to be held liable for deaths due to their criminal negligence and for DOT to act with the necessary authority to issue and enforce Vision Zero safety regulations which impact not only vehicle occupants but also Vulnerable Road Users.
  - (ii) address truck safety as a high priority due to the multitude of issues which need addressing, including: truck driver scheduling policies; truck driver compensation policies; safety technology; under-ride guards; truck driver training; CDL granting policies and procedures; hours of service monitoring; and truck maintenance.
  - (iii) maximizing the Federal Government's effectiveness in addressing traffic safety issues by, among other measures, enhancing communication among vital stakeholders—fostering an attitude of cooperation and shared goals rather than opposition and competition—as

well as making its enforcement activities transparent and accessible; and

- (iv) promoting greater coordination, communication, and consistency among the agencies and offices that enforce the Federal laws addressing traffic safety issues and support improved system-wide responses to traffic crashes and newly-identified factors, research information, and recommended solutions; and measuring the success of prevention and response efforts and providing the public with this information;
- (b) Within 1 year of the date of this memorandum, and then on an annual basis, the Task Force shall provide a report to the President on implementation efforts with respect to this memorandum.

#### Section 4. General Provisions.

- (a) This memorandum is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.
- (b) Nothing in this memorandum shall be construed to impair or otherwise affect:
- (c) the authority granted by law to an agency or the head thereof; or
- (ii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.
- (iii) The heads of agencies and offices shall assist and provide information to the Task Force, consistent with applicable law, as may be necessary to carry out the functions of the Task Force. Each agency and office shall bear its own expenses of participating in the Task Force.
- (iv) This memorandum shall be implemented consistent with applicable law and subject to the availability of appropriations, which will be specifically sought after to support the effective and timely implementation of the goals of this Task Force.
- (e) The Secretary of Transportation is authorized and directed to publish this memorandum in the Federal Register.

Respectfully submitted, Marianne Karth, February 3, 2016

### 12.3 Action Three: Sign a Vision Zero Executive Order To Authorize Vision Zero Rulemaking Policies

Federal Register Presidential Documents

For Immediate Release

Title 3—The President Executive Order \_\_\_\_\_ of \_\_\_\_\_, 2016

*Application of Vision Zero Principles to Highway Safety Regulatory Review*

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in order to improve regulation and regulatory review which impacts highway safety and thereby the preservation of human life and health, it is hereby ordered as follows:

Section 1. Statement of Vision Zero Regulatory Philosophy and Principles.

- (a) Our regulatory system must protect public health, welfare, safety, and our environment while promoting economic growth, innovation, competitiveness, and job creation. It must be based on the best available science. It must allow for public participation and an open exchange of ideas. It must promote predictability and reduce uncertainty. It must identify and use the best, most innovative, and least burdensome tools for achieving regulatory ends. It must take into account benefits and costs, both quantitative and qualitative. It must ensure that regulations are accessible, consistent, written in plain language, and easy to understand. It must measure, and seek to improve, the actual results of regulatory requirements.
- (b) However, in the review of highway safety regulations having an impact upon human life and health, agencies must apply a Vision Zero Policy which expresses the imperative that,

“It can never be ethically acceptable that people are killed or seriously injured when moving within the road transport system.” Such a policy must apply these core principles: “Life and health can never be exchanged for other benefits within the society.” and “Whenever someone is killed or seriously injured, necessary steps must be taken to avoid a similar event.” <http://www.monash.edu.au/miri/research/reports/papers/visionzero.html>

- (c) This Vision Zero Policy should replace the more conventional approach which compares costs and benefits, where a monetary value

is placed on life and health, and where that value is then used to determine whether those benefits (human life and health) justify (outweigh) the costs.

- (d) This order is supplemental to and reaffirms the principles, structures, and definitions governing contemporary regulatory review that were established in Executive Order 12866 of September 30, 1993<sup>1</sup>, as well as Executive Order 13563 of January 18, 2011<sup>2</sup>, with the difference that, in the process of selecting among alternative regulatory approaches those which maximize net benefits, the agency will not make decisions at the expense of human life and health. Toward that end: (1) Human life and health, as benefits of a regulation, will be assigned a higher priority over any costs of that regulation; (2) to the extent feasible, performance objectives or standards will be specified which have as their outcome the preservation of human life and health; and (3) when a regulation has been disregarded or not properly adhered to, so that the performance objectives have not been met, there will be a civil fine imposed and criminal charges filed where appropriate.

## Sec. 2. Public Participation

- (a) Regulations shall be adopted through a process that involves public participation. To that end, regulations shall be based, to the extent feasible and consistent with law, on the open exchange of information and perspectives among State, local, and tribal officials, experts in relevant disciplines, affected stakeholders in the private sector, and the public as a whole.
- (b) To promote that open exchange, each agency which impacts highway safety, consistent with Executive Order 12866 and other applicable legal requirements, shall endeavor to provide the public with an opportunity to participate in the regulatory process. To the extent feasible and permitted by law, each agency shall afford the public a meaningful opportunity to comment through the Internet on any proposed regulation, with a comment period that should generally be at least 60 days. To the extent feasible and permitted by law, each agency shall also provide, for both proposed and final rules, timely online access to the rulemaking docket on regulations.gov, including relevant scientific and technical findings, in an open format that can

---

<sup>1</sup><http://www.archives.gov/federal-register/executive-orders/pdf/12866.pdf>

<sup>2</sup><https://www.whitehouse.gov/the-press-office/2011/01/18/executive-order-13563-improving-regulation-and-regulatory-review>

be easily searched and downloaded. For proposed rules, such access shall include, to the extent feasible and permitted by law, an opportunity for public comment on all pertinent parts of the rulemaking docket, including relevant scientific and technical findings.

- (c) Before issuing a notice of proposed rulemaking, each agency, where feasible and appropriate, shall seek the views of those who are likely to be affected, including those who are likely to benefit from and those who are potentially subject to such rulemaking.

### Sec. 3. Integration and Innovation.

Some sectors and industries face a significant number of regulatory requirements, some of which may be redundant, inconsistent, or overlapping. Greater coordination across agencies could reduce these requirements, thus reducing costs and simplifying and harmonizing rules. In developing regulatory actions and identifying appropriate approaches, each agency shall attempt to promote such coordination, simplification, and harmonization. Each agency shall also seek to identify, as appropriate, means to achieve regulatory goals that are designed to promote innovation.

### Sec. 4. Flexible Approaches.

Where relevant, feasible, and consistent with regulatory objectives, and to the extent permitted by law, each agency shall identify and consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public. These approaches include warnings, appropriate default rules, and disclosure requirements as well as provision of information to the public in a form that is clear and intelligible.

### Sec. 5. Science.

Consistent with the President's Memorandum for the Heads of Executive Departments and Agencies, "Scientific Integrity" (March 9, 2009), and its implementing guidance, each agency shall ensure the objectivity of any scientific and technological information and processes used to support the agency's regulatory actions.

### Sec. 6. Administrative Procedures for Adhering to a Vision Zero Policy.

- (a) As required by Executive Order 12866, for each matter identified as, or determined by the Administrator of OIRA to be, a significant regulatory action, the issuing agency shall provide to OIRA:
- (b) The text of the draft regulatory action, together with a reasonably detailed description of the need for the regulatory action and an explanation of how the regulatory action will meet that need; and

- (ii) An assessment of the potential costs and benefits of the regulatory action, including an explanation of the manner in which the regulatory action is consistent with a statutory mandate and, to the extent permitted by law, promotes the President's priorities and avoids undue interference with State, local, and tribal governments in the exercise of their governmental functions.
- (b) For those matters identified as, or determined by the Administrator of OIRA to be, a significant regulatory action within the scope of section 3(f)(1), the agency shall also provide to OIRA the following additional information developed as part of the agency's decision-making process (unless prohibited by law):
  - (c) An assessment, including the underlying analysis, of benefits anticipated from the regulatory action (such as, but not limited to, the promotion of the efficient functioning of the economy and private markets, the enhancement of health and safety, the protection of the natural environment, and the elimination or reduction of discrimination or bias) together with, to the extent feasible, a quantification of those benefits;
  - (ii) An assessment, including the underlying analysis, of costs anticipated from the regulatory action (such as, but not limited to, the direct cost both to the government in administering the regulation and to businesses and others in complying with the regulation, and any adverse effects on the efficient functioning of the economy, private markets (including productivity, employment, and competitiveness), health, safety, and the natural environment), together with, to the extent feasible, a quantification of those costs; and
  - (iii) An assessment, including the underlying analysis, of costs and benefits of potentially effective and reasonably feasible alternatives to the planned regulation, identified by the agencies or the public (including improving the current regulation and reasonably viable non-regulatory actions), and an explanation why the planned regulatory action is preferable to the identified potential alternatives.
  - (iv) An assessment of the impact of the proposed regulatory action on Human Life and Health and a explanation of how the regulatory action will ensure that Vision Zero outcomes will be adequately achieved.
  - (v) Within 120 days of the date of this order, each agency shall develop and submit to the Office of Information and Regulatory Affairs (OIRA) a preliminary plan, consistent with law and its resources

and regulatory priorities, under which the agency will submit its administrative plan for achieving the regulatory objectives outlined by this Vision Zero mandate for human life and health as the priority outcome measures.

#### Sec. 7. Retrospective Analyses of Existing Rules.

- (a) To facilitate the review of existing significant regulations, agencies shall consider how best to promote retrospective analysis of rules that may be outmoded, ineffective, insufficient, or excessively burdensome, and to modify, streamline, expand, or repeal them in accordance with this Vision Zero mandate. Such retrospective analyses, including supporting data, should be released online whenever possible.
- (b) Within 120 days of the date of this order, each agency shall develop and submit to the Office of Information and Regulatory Affairs (OIRA) a preliminary plan, consistent with law and its resources and regulatory priorities, under which the agency will review its existing significant regulations to determine whether any such regulations should be modified, streamlined, expanded, or repealed so as to make the agency's regulatory program more effective in achieving the regulatory objectives with this Vision Zero mandate for human life and health as the priority outcome measures.

#### Sec. 8. General Provisions.

- (a) For purposes of this order, "agency" shall have the meaning set forth in section 3(b) of Executive Order 12866, although this order is intended specifically for regulations which impact highway safety.
- (b) Nothing in this order shall be construed to impair or otherwise affect:
- (c) authority granted by law to a department or agency, or the head thereof; or
- (ii) functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.
- (iii) This order shall be implemented consistent with applicable law and subject to the availability of appropriations.
- (iv) This order is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

Drafted by Marianne Karth, October 2015

## Petition Letter to President Obama

Dear President Obama:

After losing two daughters, AnnaLeah (17) and Mary (13) in a truck underride crash on May 4, 2013, the Karth family took over 11,000 envelopes with signed petitions from the “**AnnaLeah & Mary Stand Up For Truck Safety Care2** Petition” to Washington, DC, one year later on May 5, 2014. At that time, they met with administrators from FMCSA and NHTSA and discussed, at length, their concerns about truck safety issues.

Since that time, they have set up a non-profit, **AnnaLeah & Mary for Truck Safety**, to promote highway safety research and federal regulations to protect motorists, pedestrians, & cyclists. And, in fact, there has been some progress with the issuing of a final rule for Electronic Logging Devices and the initiation of rulemaking steps related to underride guards and minimum liability insurance for truck companies.

However, we are concerned that these safety measures, as well as others, are being unnecessarily delayed and/or weakened by the restrictions placed upon the rulemaking process by President Clinton’s Executive Order 12866. As you know, the Department of Transportation makes highway safety rules based upon how much safety measures will cost. Instead, we want to establish a U.S. **Vision Zero** goal and move toward **Zero Deaths, Zero Injuries, Zero Fear of Traffic**.

One of the biggest challenges to making change is the cost/benefit analysis. On the one side there are lives to be saved and on the other side there are companies working to make money. The trick is to try and meet everyone’s needs. The solution has to be effective in saving lives while

still being affordable for companies so that they can make the changes necessary without a lot of struggle.

The problem comes in when human life and health get the short end of the stick. The result is that many safety measures are blocked because they would cost more to implement than the “worth” of the “small” number of human lives which would be saved. That’s just not right.

Therefore we are asking you to write an Executive Order which would set a Vision Zero goal for our country. This EO will pave the way for stronger safety measures to be established in a more timely manner; saved lives will be a higher priority than saved dollars.

This Executive Order should also provide DOT with resources and authority to hold appropriate parties responsible for implementing the rules, as well as hold them accountable to meet performance outcomes which ensure human life and health. Furthermore, the Executive Order should include a requirement for annual progress reports.

On average, 33,000 people die each year in crashes on our roads. Our families cannot continue to sustain this unacceptably high number of losses and injuries. We urge you to take immediate action so that more lives will not be lost and to assure us that safety is your number one priority.

Sincerely,

The AnnaLeah & Mary for Truck Safety Vision Zero Petition on Change.org<sup>1</sup>

## Selected Comments From Current Executive Order Petition Signers

We need truck laws to improve highway safety Trucks kill too many people every year.

—*Pamela Batchelor*, Hendersonville, NC

I'm signing because as a Texan, my state has shamefully averaged 3,500 annual road deaths in the past 20 years. Based on historical data, I seriously doubt the Texas state legislature or state DOT has the skill or the desire to improve in the area of fatality reduction on Texas roads. For the safety of all road-users, the USA needs the help of a national Vision Zero strategy.

—*Lance Hamm*, Kingsville, TX<sup>1</sup>

Vision zero in road safety is an imperative public health goal, and one that is now fully realistic to embark upon.

—*Neil Arason*, Victoria, Canada<sup>2</sup>

As President of the National Coalition for Safer Roads <http://ncsrsafety.org> we believe in working together to cut down on crashes and save lives! Please! We urge you to sign this life saving petition.

<sup>1</sup><https://www.change.org/p/obama-adopt-a-vision-zero-goal-and-sign-an-executive-order-to-save-lives-not-dollars/c/367963670>

<sup>2</sup><https://www.change.org/p/obama-adopt-a-vision-zero-goal-and-sign-an-executive-order-to-save-lives-not-dollars/c/366095674>

—*Melissa Wandall*, Bradenton, FL<sup>3</sup>

I lost my dad due to a crash that was 100% preventable. Vision Zero works, and if we take it on as a country, we can dramatically reduce the number of fatalities and serious injuries. Motor Vehicle crashes are the #1 killer for people aged 3-34. This must change.

—*emily stein*, Brooklyn, NY<sup>4</sup>

I don't think that people should die as an accepted cost of our transportation infrastructure.

—*Kristin Dubrule*, Seattle, WA<sup>5</sup>

I'm signing because I don't want to see another family go through what the Karth family has.

—*tina ogg*, Grand Rapids, MI<sup>6</sup>

Road safety is everybody's business and responsibility.

—*Joan Moore*, san francisco, CA<sup>7</sup>

I lost my mother in a truck crash.

—*Shannon Shumaker*, Saint Petersburg, FL<sup>8</sup>

I am signing this petition as a widow and now single mother of three children because a tired or distracted truck driver killed my husband while he was inspecting a bridge repair in his closed-off work zone. The pain of losing a loved one to these preventable crashes is beyond words. Losing a father at such a young age will leave emotional scars for decades, and our society doesn't fully understand or offer appropriate resources for coping.

—*Amy Fletcher*, Perrysburg, OH<sup>9</sup>

I am signing in honor of my late wife Tamara Mills-Hadley whom lost her life because a phoney underride guard law was passed that was not meant to save any lives, instead it just legalized the guards already on the road in order to save money and garner campaign donations. We also lost a family friend to unsafe trucks. No more!

—*Stephen Hadley*, Washougal, WA<sup>10</sup>

I'm signing because no one should have to suffer a sudden, unexpected loss of a loved one due to a preventable crash.

—*Andrew Young*, North Ridgeville, OH<sup>11</sup>

WE NEED A VISION ZERO GOAL AND  
SIGNS...NOW TO SAVE LIVES!!!

—*DONNA LAGOMARSINO*, Wilmington, MA<sup>12</sup>

I'm signing because the loss of one human life in the pursuit of profit is wrong! Safety first!

—*Hershel Hartford*, Fayetteville, AR<sup>13</sup>

I'm signing because tragedies like this one can be avoided.

—*Aaron Kiefer*, Morrisville, NC<sup>14</sup>

## Comments by Signers of the Petition

**14: Rebekah Black, Arlington, Texas, United States**

Please change adopt stronger safety rules so that more lives can be saved. My sisters AnnaLeah and Mary Lydia are gone forever due to a truck collision, and no other family should have to go through this. Save lives.

**21: katy Hartigan, Grayslake, Illinois, United States**

There shouldn't be a cost benefit analysis for lives...

**39: Janet Schweitzer, Chicago, Illinois, United States**

I worry every day about my children's safety.

**379: Joanna van Casteren, Marktheidenfeld, Germany**

Wir lieben die tieren

**450: Barbara Daniels, UNION DALE, Pennsylvania,  
United States**

THIS IS NOT AN ANIMAL WELFARE ISSUE.

**540: Ake Lindberg, Eskilstuna, Sweden**

Set a strict zero vision!

**596: Marianne Karth, Rocky Mount, North Carolina,  
United States**

There is no one that this does not potentially impact in some way. We are asking for bold and decisive action to reduce tragic, preventable crash fatalities. Don't wait until it touches you personally to move heaven & earth to identify and require the best possible protection. Once a loved one becomes a motor vehicle crash statistic, it will be too late—they will not come back to you.

**1319: Janet Watson, Rocky Mount, North Carolina,  
United States**

I have good friends who lost 2 beautiful daughters in a horrific truck underride accident that could have been prevented with tougher trucking laws. Please sign this petition to help make a change in regulations that will help prevent more deaths on the road.

**1390: nina kavin, Evanston, Illinois, United States**

I always want to avert my eyes when I see the highway billboards that announce the number of traffic death to date in Illinois, but I make myself look to remind myself and my kids to drive safely and defensively. The numbers are staggering and devastating.

**1896: Lauren Valverde, Evanston, Illinois, United States**

This breaks my heart, I am so very sorry.

**2247: Sherri Gillespie, LOS GATOS, California, United  
States**

OMB & DOT 1. Adopt rational Vision Zero Safety strategy. 2. Apply Vision Zero principles initiating rulemaking to require forward collision avoidance.

**3119: Lana Briscoe, Northport, New York, United States**

Secretary Foxx, it is avoidable and inexcusable that about 40,000 Americans die in vehicular crashes every year. Stop the cost/benefit analysis bean counting. The lives of Americans are at stake.

**3335: Elaine Fischer, ROANOKE, Virginia, United States**

Lives are at stake!

**3801: Lucy Schneider, WESTWOOD, New Jersey, United States**

This is a horrific tragedy that could have been prevented. I urge the Department of Transportation to adopt a VISION ZERO Policy!

**4009: Jeanette Naumann, Arlington, Texas, United States**

I was with members of this family when they suffered the tragic loss of the their sisters and daughters. No parent should have to go through this when it can be prevented.

**4684: Keith C Schnip, BELLINGHAM, Washington, United States**

Big trucks, i.e. 18 wheelers, etc. should be banned from the nation's Interstate Highway System. They cannot coexist safely with regular automotive traffic, i.e. cars. The roads simply are not big enough or safe enough.

**4722: Sheelagh O Cathasaigh, EUREKA, California, United States**

Bring back freight trains! Lessen roadway and highway long hauls by bring back freight trains.

**4765: Todd Freese, Midland, Texas, United States**

These dear friends lost their daughters due to a needless crash. Would you please join me as I join them in their quest for safer roads. God Bless You.

**5105: Charlie Gray, Fuquay Varina, North Carolina, United States**

Driver training and qualification standards must be heightened

**5139: Road Crash, Winchester, United Kingdom**

Best wishes Marianne not far to 6,000

**5144: Darla Creel, Fort Worth, Texas, United States**

I knew this family. What was sad is that these lives were lost going to a weekend of three graduations and a wedding. We need to support change for lives.

**5266: Isaac Karth, Rocky Mount, North Carolina, United States**

Three years ago, I was sitting in my apartment, working on my class projects, when I got a phone call that turned my world upside down. My family's car had been hit by a truck, and I was the first person that the hospital was able to reach. There was a lot of confusion; no one knew where my two sisters who had been in the back seat of the car had been taken. I had a pair of dice in my pocket that day, the same pair of dice that I had when my father called me later that evening with the news that my sister had died in the crash.

Humans are bad at estimating probabilities. A one-in-a-million chance sounds rare, but that's close to the odds the NWS reports for being struck by lightning, and 330 Americans are injured that way every year. It's rare, but it happens. In probability theory, it's called the law of large numbers. If you roll the dice often enough, or for enough people, the dice are going to come up as ones at a predictable, measurable rate.

The IIHS reported that in 2013, there were 10.3 deaths from motor vehicle crashes per 100,000 people. That's about one-in-ten-thousand, way more likely than one-in-a-million. And, unlike other leading causes of death, this is an entirely human-created problem, one that didn't exist two hundred years ago.

Automotive safety has been improving over time. But it is still one of the leading causes of death in America. Curing cancer, one of the other leading causes, is expensive and difficult, requiring research just to figure out if it is even possible. In contrast, for motor vehicle deaths there are many cases where we already know simple ways to reduce motor vehicle fatalities, such as effective underride guards, and we have promising research for even more. We shouldn't settle for one-in-ten thousand, or even one-in-a-thousand. We should strive to be better than that. Human lives shouldn't be a nickle and dime proposition.

Even low chances of death are still too high. I shouldn't have to roll the dice every time I need to leave my house. I shouldn't have to wonder, every

time my family is out on the road, if today is going to be the day that they roll too many ones again.

**5350: Catherine Memmer, Commerce Twp, Michigan,  
United States**

You could put signs way ahead!!! This is senseless. What if it was your kids that were killed!! Don't be so cheap!!!!

**6393: Donna Profeta, Ballston Lake, New York, United  
States**

Our families' lives are worth more than the cost in dollars.

**7072: Michelle Novak, Delevan, New York, United States**

Another family member whose deceased 22 year-old nephew's life was weighed against a load of cookies and found lacking. We have had enough. You can stop this. But your political will seems to always lose to the monetary will of those executives and shareholders in the industry. Oh, if you could feel shame.....or empathy.

**8844: Brie Handgraaf, Rocky Mount, North Carolina,  
United States**

The bottom line should NEVER outweigh the cost of a human life. The status quo needs to be changed before anyone else suffers such a tragedy as the Karths.

**9825: Ryan McMahan, Holly Springs, North Carolina,  
United States**

I work in the accident reconstruction industry and see countless underride accidents each year, many ending in serious injury or death. The severity of injury in these types of crashes could be significantly reduced with the simple implementation of additional bracing on the trailers that travel our roadways.

**9857: Dennis Fox, ANTELOPE, California, United States**

Smoke alarm manufactures put \$ before peoples safety also. Please help save millions of people from dangers of ionization smoke alarms that fail to warn occupants of smoldering smoke that are in 90% of all homes. 100's of 1000's have been killed or seriously burned over last 40 years due to ionization alarms inability to detect smoldering smoke. But they are cheaper to make so more profits compared to safer photoelectric alarms. copy and paste link below <http://www.thepetitionsite.com/takeaction/213/386/111/>

**10598: Tiffany Snyder, BOULDER, Colorado, United States**

937e6a8a-6f70-11e5-84aa-06f32047ed2d

**10919: Sonya Silver, Nashville, North Carolina, United States**

Everyone's life is priceless. So are the unconditional love that we express to our love ones. So we need to make a change and to anyone denying us to do so need to ask themselves how much is their families worth?

**11124: Ed Slattery, Lutherville Timonium, Maryland, United States**

My wife was killed and two sons seriously injured, one permanently, when a trucker fell asleep at the wheel and pushed their car under the rear end of another semi in front of them while coming into a construction zone.

**11282: David M. Dunn, LANSING, Michigan, United States**

Seriously? Putting profit before human life is short term thinking and, by the way, immoral.

**14641: Michael Hawkins, Travelers Rest, South Carolina, United States**

In 2003 a truck driver on duty for 29 hours straight, fell asleep at the wheel and rear ended my SUV. The tractor trailer was traveling at 55 mph

and crashed into me while at a dead stop and crushing me into an RV. Near death, first responders worked frantically for 45 minutes to free me from my SUV and the drivers side that had been crushed to 16 inches. 30 surgeries and 12 years later I have fought hard to live and fight for cherished loved ones like Annaleah and Mary Lynn Karth that can't fight for themselves. Profit over life must stop!

**15068: Peter Blattner, Praden, Switzerland**

Each of the drives too fast, with the mobile phone at the ear, drunk or on drugs, you should first confiscate the car, then squeeze into a small dice together, and finally, as the crowning, the driver's license for life lock. (And if you want, it may even give a few dozen steps to the place where the sun never shines inside! (In his asshole)

**15880: LELA Lesson, Cortaro, Arizona, United States**

Please prevent another family from losing a loved one and going through this heartbreak.

**15898: Dianne Sullivan, Modesto, California, United States**

We should be living in a country of HUMAN VALUES, NOT DOLLAR VALUES

**15904: Michelle Dutton, Chicago, Illinois, United States**

The Traffic Safety Coalition is proud to support the call for a Vision Zero safety model working towards zero deaths and zero grave injuries on our nation's roads.

**15905: Suzann Oberhauser, Somerset, Ohio, United States**

We lost our daughter in a red light running crash on 1/26/02. A red light camera might have stopped the man who killed her. Our State has now virtually outlawed the use of red light cameras. Where is the cost/benefit in that???

**15908: Emily Stein, Medford, Massachusetts, United States**

Vision Zero has worked to reduce deaths in NYC, as well as in many countries in Europe. It's time for the US to take traffic safety seriously and prevent more deaths on our roads.

**15909: The National Coalition For Safer Roads, Bradenton, Florida, United States**

Please support this lifesaving Policy! We are losing precious lives daily around our country. Best practices and safety devices alike must be utilized. #Safetysaveslives

**15910: Joan Moore, san francisco, California, United States**

Protect the Nations highways for everyone. We have waited long enough. This insanity must stop. Families are dying.

**15918: Guenter Lob, Munich, Germany**

To reduce traffic fatalities we need a worldwide VISION ZERO

**15921: Drue Freeman, Cupertino, California, United States**

Let's save lives. The technology exists to do this!

**15928: Connie Nance, Fredericksburg, Virginia, United States**

If you are an Advocate, BE AN ADVOCATE. Show up for those whose voices have been silenced.

**15929: D. J. Young, Delaware, Ohio, United States**

For a free and democratic society, Vision Zero is a moral obligation. For our leaders to tolerate 33,000 traffic-related deaths and untold disabling injuries per year is a national tragedy. None of these people should have been discarded through the application of a flawed cost-benefit analysis approach to highway safety policy. Please help every person have a safe drive home.

**15961: Pamela Dubsky, HOLIDAY HILLS, Illinois,  
United States**

Some laws need to be changed to help change the amount of lives being lost to accidents on the highway and elsewhere! This could have been avoided!!!!!!

**16143: Kathy Moore, GARDNERVILLE, Nevada, United  
States**

I agree wholly with this petition in its entirety.

GOD Bless Annaleah, Mary, their friend, and family.

**16541: Diane Davies, Fredericksburg, Virginia, United  
States**

Highway 41, a two-lane road that transects mid-state California, is and has been known to be a dangerous road for decades. Yet, even though it is the only route between Fresno and the California coast, and despite increasing traffic with each year that goes by, only portions of that road have been expanded to four lanes. Though plans were drafted in the 1950's, and the highway came into national notoriety when James Dean was killed on it, AND head-on collisions have occurred on that road nearly every year, NOTHING SIGNIFICANT has been done to make that road safe from end to end. This is a perfect "Vision Zero" example. These unnecessary deaths on Highway 41 have to end!

**19678: Stefan Gudmundsson, Morrisville, North Carolina,  
United States**

A zero life vision is something every developed country has. A goal will set the wheels of innovation moving!

**19701: Daniel Baergen, Leslie, Michigan, United States**

Please invest in highway safety improvements for the benefits of all travelers.

**19733: Arun Vasireddy, hyderabad, India**

Make USA safer, please. My girlfriend in USA got involved in a crash and it was just luck that saved her. She is worth more than any cost to me. Cost of a life is priceless. Please see the emotional side of all the world, please.

**19791: Ammie DeBus, Moreno Valley, California, United States**

Signing in memory of Tina and Tami's sister and family.

**19823: Wendy Morrison, Camarillo, California, United States**

My nephew, Daniel McGuire, died when a big rig truck lost control and plowed into 10 cars. This was an accident and death that never should have happened. The truck had faulty brakes, an undertrained driver and weighed more than allowed. Please sign this petition to get more safety laws passed and stricter rules for truckers. Thank you.

**19913: Keelie Barrow, Humble, Texas, United States**

How many more have to die before the government starts listening?

**19963: Shelbie Dillow, Carmel, Indiana, United States**

My grandfather was killed in a car accident that could have been prevented since semi driver shouldn't have been out of prison in the first place, he was also an ex con and murderer that shouldn't have been able to drive a semi since he didn't have a CDL legally. Two days in a holding cell is all he got, what semi driver try's to turn right going 60+ mph instead of blowing through the red light at an intersection?? My life fell apart on Friday December 10th 2010.

**20092: Bob Radway, Fountain Hills, Arizona, United States**

Need safe parking for truck drivers to sleep

**20127: Kirsten E Rudiger, crescent city, California, United States**

I would like to recommend pedestrian overpasses for every town in California & the U.S.A.

**20271: Rb Redmond, Angier, North Carolina, United States**

The life you save could be a child of your own.

Part V
