

Hundreds of people die every year when pedestrians, cyclists, motorcyclists, and passenger vehicles go underneath trucks. Over 4,000 have died during the past 19 years since the last underride regulation was issued in 1998. Families of victims and safety advocates are calling for an end to preventable truck underride tragedies.

It can happen to anyone -- even if their car has a 5-Star Crash Rating. It can happen anywhere. It happened to 17-year-old AnnaLeah and 13-year-old Mary Karth when their car went under the rear of a semi-trailer in Georgia on May 4, 2013. And it happened to 26-year-old Roya Sadigh when her car went under the side of a truck in Indiana on November 24, 2004.

U.S. regulators have debated for decades about how to stop the tragedy of underride deaths -- including, since 1969, the possibility of requiring underride protection to be added to the sides of large trucks. But they have not done so, even though engineers have already found ways to solve this problem.

It's time for Congress to mandate that the National Highway Traffic Safety Administration update underride regulations, and for the trucking industry to install effective underride protection. The Stop Underrides Act of 2017 -- introduced by Senator Gillibrand (D-NY), Senator Rubio (R-FL), and Congressman Cohen (D-TN) on December 12th -- will allow creative engineers to put effective underride protections on every truck, and help end preventable underride tragedies.

Please co-sponsor this life-saving legislation. You have the power to make the roads safer.

Sherry	Mickelson	Richland	WA	UNITED STATES	A long time ago, my mother an RN and we five small children were waiting at a stop light. The City Truck behind us - it turns out had breaks that failed. It was only a small bump but there was damage to health (whip lash so on). NO deaths but sill years of effort. But I had a friend in collage who was driving down to visit (again decades ago but still viable) and her small car was hit from behind and it slammed into the larger truck up front. The height of the truck under carriage was so that - her small car was leveled from the top of the car. She was decapitated and died instantly. First, there is a reason the driving instructions say to be x car lengths behind the car in front of you - had the driver done so - perhaps this would not have occurred. Few do so today even when speeding down a highway. That said - IF it is preventable by this mechanism then what cost to avoid such loss of life. What ever it takes. People young people at the beginning of their lives snuffed out and for what

Andrea	Nutt	Sammamish	WA	UNITED STATES	If it can be prevented by making trucks employ a simple device that saves lives, why would our lawmakers create the law now? Just like PTC on trains (they extended the date that requires all trains to have this technology) and requiring bluetooth and backup cameras in cars, the mandate should be part of the solution and not delayed. It's not just infrastructure that needs attention - if we don't enact global changes now it will not make a difference.

Polly	Tarpley	Poulsbo	WA	UNITED STATES	This bill is necessary to prevent further ghastly accidents as this one was! The lack of protection by these trucks is inexcusable in today's world, and should (and UST) be required on all such rigs!!!
Dara	Reynolds	Longview	WA	UNITED STATES	This could save many American lives. You may think at first that the cost is damaging to the truck companies, but when you consider loss of lives of children, loss of life of people in the workforce, and time in court after a fatal crash, that argument goes out the window. Now, with that being said I don't have number for the cost to cover the bottom of the truck. But, installation and manufacturing of these covers should give room to start new business of value and quality with the right people.
Dena	Otto	Kent	WA	UNITED STATES	This is a matter of life and death. We should value life more than money. If a simple change can be the difference between weather a person comes home to their family at the end of the day in one peace, then this needs to be placed ineffect.
Lou	Orr	Shoreline	WA	UNITED STATES	This is a no brainer! Some truckers say every pound on the truck takes away a pound that can be put in the truck. I understand that but the families of 4,000 people would argue the importance.
